

ambos.io APP

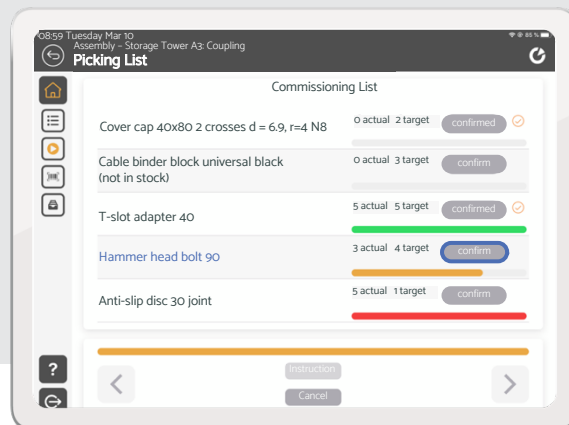

The worker chooses an illustrated step-by-step instruction and can opt for batch production.

The app checks whether all articles necessary for assembly are in stock.

The ambos.io app guides workers throughout the entire assembly process.

Enhanced Quality

- ▶ Train and instruct employees swiftly and with high reliability by comprehensive digital assembly assistance
- ▶ Process control in assembly
- ▶ Weight surveillance during and after assembly enables kitting application

During assembly, a color-coded progress bar indicates whether the correct amount of the right article has been withdrawn, in real time.

By clicking on the arrow or the button on the Assembly Station, the next step is shown. It is also possible to return to previous steps.

Security of Supply

- ▶ Examine available stock before start of assembly
- ▶ Register stock changes in real time
- ▶ Notification if article falls below its specified reorder threshold
